Appendix II

Status Report #1

ALBUQUERQUE, NEW MEXICO - 25 August 1951

On the evening of 8 August 1951, at 11:30 p.m., a "Security Guard" and his wife observed what they described to be a flying saucer aircraft similar to the "Bee" Fly (see Appendix I) just over the yard of their trailer home in the West part of Albuquerque. They stated that the aircraft was about one and one half times the wing span of a P-51, with which they were familiar. The object was flying low, the altitude was thought to be about 500 ft. - 1000 ft., and there was no sound that could be attributed to the object. The color of the object was not apparent due to the twilight but dark charcoal stripes were noticed under the wings. Six to eight pairs of soft glowing lights were noticed in the trailing edge of the wings. The object was believed to be about 300 - 400 mph and the object was on a heading of approximately 100°.

(See Appendix I for the photo report and photo.)

Weather

Broken clouds at 12,000 ft., visibility five miles, wind 3 at 5 mph.

Finding of Investigation

The possibility of this being a known aircraft was checked with negative results. The AC and Radar Station at Kirtland AFB did not observe any unidentified aircraft.

The Guard's background was checked and since he had a "C" clearance, it was determined that he is mentally stable.

The photos taken of the V-shaped object at Lubbock, Texas, (see Appendix I) were sent to Albuquerque. They were shown to the sources by the P.O.I. and sources stated that arrangement of lights on the object they saw was similar to the photo. They sketched in the wing as they saw it.

An investigation was made to determine whether or not any one else had seen the object but only negative results were obtained.

Further evaluation of this incident depends on the outcome of attempts to establish the authenticity of the Lubbock photos.

DOWNGRADED AT 8 YEAR INTERVALS
DECLASSIFIED AFTER 12 YEARS.
DOD DIR 5200.10

ALBUQUERQUE, NEW MEXICO - 25 August 1951

I. DISCUSSION OF INCIDENT

On the evening of 25 August 1951, at 21:52 MST, a Sandia Base Security Guard and his wife observed what they described to be a flying wing type aircraft similar to the Northrop Fly-Wing Bomber (B-49) pass over the backyard of their trailer home in the east part of Albuquerque. They judged the wing span of the aircraft to be about one and one half times the wing span of a B-36, with which they were familiar. The object was flying low, the altitude was thought to be about 800 ft. - 1000 ft., and there was no sound that could be attributed to the object. The color of the object was not apparent due to the twilight but dark chordwise stripes were noticed under the wings. Six to eight pairs of soft glowing lights were noticed on the trailing edge of the wing. The speed was judged to be about 300 - 400 mph and the object was on a heading of approximately 160°.

(See Appendix I for possible related incident.)

II. WEATHER

Broken clouds at 17,000 ft., visibility five miles, wind S at 5 mph.

III. STATUS OF INVESTIGATION

The possibility of this being a known aircraft was checked with negative results. The AC and Radar Station at Kirtland AFB did not observe any unusual or unidentified aircraft.

The guard's background was checked and since he has a "Q" clearance, it has been assumed that he apparently is mentally stable.

An investigation was made to determine whether or not any one else had seen the object but only negative results were obtained.

The photographs referred to in Appendix I were sent to the OSI at Kirtland AFB. These photos were shown to the sources and they stated that the photos resembled the exhaust or light pattern of the object. A sketch, drawn by the observers, is shown in this Appendix.

It is interesting to note that a very similar sighting took place in Lubbock, Texas. The exact time and date of the sighting could not be determined due to the fact that the observer believed she had seen an illusion of some type and did not report the incident. The only date that could be given was "late in August or early September."

IV. CONCLUSIONS

None. The investigation will be continued until the authenticity of the photos in Appendix I can be determined.

EX-100-7 5-11-15 Report #2

Appendix IIALBUQUERQUE, NEW MEXICO - 25 August 1951I. DISCUSSION OF INCIDENT

On the evening of 25 August 1951, at 1153 PST, a Senda Base Security Guard and his wife observed what they described to be a flyin-wing type aircraft similar to the Northrop Fly-Wing Bomber (B-40) pass over the backyard of their trailer home in the east part of Albuquerque. They judged the wing span of the aircraft to be about one and one-half times the wing span of a B-36, with which they were familiar. The object was flying low, the altitude was thought to be about 300 ft. - 1000 ft., and there was no sound that could be attributed to the object. The color of the object was not apparent due to the twilight but dark vertical stripes were noticed under the wings. Six to eight pairs of soft flashing lights were noticed on the trailing edge of the wing. The speed was judged to be about 200 - 400 mph and the object was on a heading of approximately 160°.

(See Appendix I for possible related incident.)

II. WEATHER

Broken clouds at 17,000 ft., visibility five miles, wind S at 5 mph.

III. STATUS OF INVESTIGATION

The possibility of this being a known aircraft was checked with negative results. The AD and Radar station at Kirtland AFB did not observe any unusual or unidentified aircraft.

The guard's background was checked and since he has a "Q" clearance, it has been assumed that he apparently is mentally stable.

An investigation was made to determine whether or not any one else had seen the object but only negative results were obtained.

The photographs referred to in Appendix I were sent to the OSI at Kirtland AFB. These photos were shown to the sources and they stated that the photos resembled the exhaust or light pattern of the object. A sketch, drawn by the observers, is shown in this Appendix.

It is interesting to note that a very similar sighting took place in Lubbock, Texas. The exact time and date of the sighting could not be determined due to the fact that the observer believed she had seen an illusion of some type and did not report the incident. The only date that could be given was "late in August or early September".

IV. CONCLUSIONS

None. The investigation will be continued until the authenticity of the photos in Appendix I can be determined.

Appendix IIALBUQUERQUE, NEW MEXICO - 25 August 1961

On the evening of 25 August 1961, at 21:30 MDT, a Sandia Base Security Guard and his wife observed what they describe to be a flying wing type aircraft similar to the Northrop Fly Wing Bomber (B-49) pass over the backyard of their trailer home in the east part of Albuquerque. They judged the wing span of the aircraft to be about one and one half times the wing span of a B-36, with which they were familiar. The object was flying low, the altitude was thought to be about 800 ft. - 1000 ft., and there was no sound that could be attributed to the object. The color of the object was not apparent due to the twilight but dark chordwise stripes were noticed under the wings. Six to eight pairs of soft glowing lights were noticed on the trailing edge of the wing. The speed was judged to be about 300 - 400 mph and the object was on a heading of approximately 160°.

(See Appendix I for possible related incident.)

Weather

Broken clouds at 17,000 ft., visibility five miles, wind S at 5 mph.

Status of Investigation

The possibility of this being a known aircraft was checked with negative results. The AC and W Radar Station at Kirtland AFB did not observe any unusual or unidentified aircraft.

The guard's background was checked and since he has a "Q" clearance, it has been assumed that he is mentally stable.

The photos taken of the V-shaped object at Lubbock, Texas, (see Appendix I) were sent to Albuquerque. They were shown to the sources by the O.S.I. and sources stated that arrangement of lights on the object they saw was similar to the photo. They sketched in the wing as they saw it.

An investigation was made to determine whether or not any one else had seen the object but only negative results were obtained.

Further evaluation of this incident depends on the outcome of attempts to establish the authenticity of the Lubbock photos.

THE INSPECTOR GENERAL
17TH DISTRICT OFFICE OF SPECIAL INVESTIGATIONS
KIRTLAND AIR FORCE BASE, NEW MEXICO

File No: 24-0 SECRET INTELLIGENCE REPORT 27 August 1951
SUBJECT: Unconventional Type of Aircraft Sighted by HUGH R. YOUNG
at Albuquerque, New Mexico, at 2158 Hours, 25 August 1951
TO: Director of Special Investigations
Headquarters, United States Air Force
Washington 25, D. C.

1. SYNOPSIS: Sandia Base Security Guard, HUGH R. YOUNG, reported sighting large object similar to Flying Wing, but one and a half (1 1/2) times larger than B-36, observed by himself and wife, pass over East Albuquerque Area at 2158 hours, 25 August 1951, in south-southeastern direction, altitude 800 to 1000 feet at approximately 300 miles per hour. Object had glowing white lights on trailing edge of wing and black stripes under wing. The object made no sound whatever and flew straight and level. Lights from Central Avenue and autos reflecting off object gave it silver color. No means of propulsion noted. Sighting and observations of YOUNG confirmed by his wife.

2. DETAILS: At 1000 hours, 26 August 1951, Lt WILLIAM L. DAW, Officer of the Guard, Kirtland Air Force Base, New Mexico, notified the Office of Special Investigations' Duty Agent, HAROLD E. PETERSON, that a Mr. HUGH R. YOUNG of 4212 N. Copper Ave., Albuquerque, New Mexico, had reported sighting an unconventional type of aircraft. When interviewed by S/A PETERSON, YOUNG revealed that he is a guard for the Sandia Corporation, and works on the night shift at Sandia Base and is "Q" cleared. On 25 August 1951, YOUNG stated he was standing in front of his trailer with his wife, waiting for his ride to work, when he saw an object approaching from the north on a true course of about 1600 to 1700. The flight path of the object was estimated by YOUNG to be approximately 150 east of the Zenith from his point of observation. The object, as described by YOUNG, was similar to the Northrop Flying Wing (B-49), in that it had no fuselage, the wings were swept back approximately 150 but had no taper. As the object passed over the brightly lighted Central Avenue (US Highway 66), the reflection of these lights could be seen on the underside of the object. The size of this object was described by YOUNG as to be one and a half (1 1/2) times that of the B-36, and was silver in color except for 6 or 8 dark stripes on each side of the center running longitudinally on the underside of the wing.

File 24-0
Subj: Uncon Type of Acft

SEP/64
27 Aug 51

On the trailing edge of the wing were 5 to 6 pairs of round glowing white lights, located between the dark stripes on the underside of the wing. These lights went out just after the object passed to the north of U. S. 66. YOUNG stated this object made no sound whatever, flew straight and level, at an estimated speed of 300 miles per hour and altitude of 800 to 1000 feet. No method of propulsion was visible and the object faded from his view due to darkness. YOUNG stated the object was in his view for approximately 30 seconds. He purposely checked the time at the end of sighting and noted it to be 2158 hours. YOUNG's wife also observed this object and agrees with his observations in every respect. YOUNG was very positive about his observation, is familiar with all types of aircraft, and apparently very sincere.

3. ACTION: Attempts are being made to locate other persons who may have observed this object, and if any positive information is developed, the results will be forwarded to your Headquarters.

Ref further investigation on sighting of unconventional acft
over Albuquerque by civilian witnesses, 2158 hours, 25 August re-
veals following:

Acft was chevron shaped, flying wing type. One and one half
to twice size of B-36. Dark stripes visible on under side of wings
from leading to trailing edge. No fuselage visible. Wings swept
back approx 15 degrees. No taper of wings from mid section to tip.
Six to eight soft lights visible on trailing edge of wings. Pro-
pulsion system unknown, acft made no sound. Witnesses estimated
speed and altitude to be 300-400 MPH, 800-1,000 feet. Acft appeared
from northerly direction on an estimated heading of 160 degrees.
Observation made by Mr. and Mrs. Hugh R. Young at their residence,
4212 Copper Avenue. Sighting was made from ground level with acft
almost overhead. Mr. Young is employed as security guard at Sandia
Base and apparently is reliable. Weather conditions at time of
sighting: Temp 64 degrees F, dew point 55 percent, wind South 5
MPH, vis 5 miles, ceiling 17,000 feet from ground level, broken
clouds. Object was not detected on ground radar at Kirtland AFB.

Certified copies of narrative statements of witnesses
being forwarded your Hq. No other info available.

APPROVED 1 JUN 1948

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency) CG 34th Air Division (Det) Kirtland AFB, New Mexico	REPORT NO. 1	PAGE 2 OF 2 PAGES
---	--------------	-------------------

1. Further investigation and interrogation of witnesses by OSI on this observation of unconventional aircraft has revealed:

1. Shape of aircraft: Chevron-shaped, flying wing type.
2. Size: One and a half to twice size of B-36.
3. Color: Unknown. Dark stripes visible at intervals on under side of wing from leading to trailing edge.
4. Number of aircraft: A single ship.
5. Aerodynamic features: No fuselage visible. Wings swept back at approximately 15 degrees. No taper of wings from mid-section to tip.
6. Trail or exhaust: Noticeable on trailing edge of wing - six to eight soft lights in pairs with spacing observed between each pair.
7. Propulsion system: Unknown. Aircraft made no sound.
8. Speed: Estimated 300-400 MPH.
9. Sound: Silent.
10. Maneuvers: Flew straight and level.
11. Manner of disappearance: Flew away from observers until it faded from sight.
12. No running lights were visible from the ground.

(b) Aircraft was observed at 2158 hours, 25 August 1951 for about 30 seconds.

(c) Aircraft was observed from ground level, at an estimated altitude of 800-1000 feet, at an estimated speed of 300-400 MPH.

(d) Observation was made by witnesses from their residence at 4212 E. Copper Avenue, Albuquerque, New Mexico. Aircraft appeared from northerly direction on a heading of estimated 160 degrees. Sighted directly overhead.

(e) Witnesses are: Mr. and Mrs. Hugh R. Young, 4212 East Copper Avenue. Mr. Young is employed in the Security Service at Sandia Base. It is assumed he is reliable. Subject witness holds a "C" clearance.

(f) Weather conditions at time of sighting: Temperature 64 degrees F, Dew Point 55, Wind-South at 5 MPH, Visibility 5 miles, Ceiling 17,000 feet (from ground level), Broken clouds.

(g) Sighting of object can not be attributed to any activity or condition, meteorological or otherwise, present at time of observation.

(h) There are no photographs or other physical evidence to substantiate observation of "object."

(i) Object was not detected on radar scopes of 690th AC & W Sq at Kirtland AFB, New Mexico.

(j) Aircraft airborne in area near time of incident; Commercial flights landing at Albuquerque Municipal: TWA at 2023 and 2043 hours; Continental at 2107 hours and Frontier at 2311 hours. USAF flights arriving at KAFB: B-25 at 2107 hours, C-54 at 1917 hours and one B-25 departure at 2219 hours. No unfamiliar aircraft or objects reported to tower.

2. Certified copies of narrative signed statements of witnesses are attached.

THIS PAGE IS UNCLASSIFIED

THIS PAGE IS UNCLASSIFIED

UNCLASSIFIED

26 August 1951
4212 East Copper Ave.
Albuquerque, N. Mex.

On the night of 25 August 1951, at my home at 2158 hours I observed for about 30 seconds an unfamiliar aircraft traveling from 10° west of north in the direction of 10° east of south. The rate of speed of the aircraft might have been 350 miles per hour.

The aircraft was low enough for the neon and car lights of East Central Avenue to be reflected from it. The altitude of the aircraft was difficult to judge.

The size of the aircraft was apparently 1½ to 2 times of that of a B-36.

The type of the aircraft was that of one with wings swept back 15° approximately. No fuselage was visible. The wings did not appear to taper at the outer ends. On the rear edge of each of the wings at least 6 and possible 8, soft, white lights were visible. These lights were round, not trailing as in jet aircraft exhausts seen at night. These lights were grouped in twos with a larger distance between the pairs than between each one in a pair. No red or green lights were visible. As the object moved further south the lights were not visible.

The underneath surface of the wings of the aircraft appeared to have stripes running from the leading edge to the rear edge of the wings between each pair of lights. These stripes reflected the light whereas the areas between the lights did not reflect light well.

The most outstanding feature of this observation was the fact that there was no audible sound from motors or jets. In fact the aircraft made no noise that I could hear.

The above statement is true to the best of my ability to describe this incident.

Signed,

Mrs. Hugh R. Young
(Emily G. Young)

26 August 1951

On the 25th of August 1951 at 2158 hours from my home located at 4212 East Copper Ave., Albuquerque, New Mexico I observed the following described aircraft.

This aircraft was flying in a south by east direction at a speed I thought to be about 300 miles per hour.

The altitude was difficult to judge, but the aircraft was low enough so that the lights from Central Ave. reflected from the lower side of the wings.

This aircraft was unusual in the following ways, there was no sound of motors or jets in fact there was no sound at all that I could hear. I could see no fuselage on this aircraft. The size I judged to be at least one and one half times as large as a B-36 and was shaped like a spread V with the wings sloping back at an angle of about 15°.

On the rear edge of the wings soft white lights were located in pairs with not less than six of these on each side of center. These lights were very different from motor or jet exhausts as seen at night. I am familiar with the appearance of these.

From the front edge of the wing stripe extended to the rear edge of the wings with the strip ending between the lights of each pair. These strips had poor reflection.

Each pair of lights were separated by about eight times the distance between the lights of one pair.

The wings appeared to retain their size from the center to the end without any taper.

No identification or markings could be seen and this aircraft had no colored lights of any kind that could be seen. The aircraft was in my sight about 1/2 minute.

This is a true description of the aircraft as I observed and remember it.

TITLE Unconventional Type of Aircraft sighted by Mrs. E. Young at AFB area, New Mexico, at 7:00 hours, 25 August 1951		
CHARACTER SPECIAL INVESTIGATION		
REFERENCE FBI MEMO RPT, DO #17 to Co. OSI, File 24-1, dtd 27 Aug 51		
SYNOPSIS <p>Investigation requested by CG, 4901st Support Wing (Atomic) Kirtland AFB, New Mexico, to determine circumstances surrounding an observation of an unusual type of aircraft on 25 July 1951. Mr. & Mrs. YOUNG executed signed statements that they observed a flying wing type aircraft on night of 25 July. This aircraft made no sound, was larger than B-36, and flew low over Albuquerque in north to south direction. Investigation of Commercial Air Carriers and Base Operations failed to reveal any aircraft to be in vicinity at time of observation. Check of local Police Department, Sheriff, State Police, FBI and Security Guards at Kirtland AFB and Sandia Base failed to produce corroborating observations.</p>

DETAILS:

1. This investigation requested by Commanding Officer, 4901st Support Wing (Atomic), Kirtland Air Force Base, New Mexico, to determine the circumstances surrounding the reported observation of an unusual aerial phenomenon by Mr. and Mrs. EUGENE E. YOUNG, 4212 E. Copper, Albuquerque, New Mexico, on 25 August 1951.

AT ALBUQUERQUE, NEW MEXICO

2. On 26 August 1951, Mr. EUGENE E. YOUNG was interviewed at his trailer home at 4212 E. Copper. YOUNG stated that he is a security guard for the Sandia Corporation, and works the night shift at Sandia Base. YOUNG revealed that on the night of 25 August 1951, a few minutes before ten (10:00) o'clock, he and his wife were standing outside their trailer home, waiting for his wife to work, when they both saw an unusual type aircraft flying overhead. YOUNG and his wife prepared statements describing what they observed, which are set forth below:

"26 August 1951

"On the 25th of August 1951 at 2150 hours from my home located at 4212 East Copper Ave., Albuquerque, New Mexico I observed the following described aircraft.

"This aircraft was flying in a south by east direction at a speed I thought to be about 300 miles per hour.

"The altitude was difficult to judge, but the aircraft was low enough so that the lights from Central Ave. reflected from the lower side of the wings.

"This aircraft was unusual in the following ways, there was no sound of motors or jets in fact there was no sound at all that I could hear. I could see no fuselage on this aircraft. The size I judged to be at least one and one half times as large as a B-36 and was shaped like a spread V with the wings sloping back at an angle of about 15°.

"On the rear edge of the wings soft white lights were located in pairs with not less than six of these on each side of center. These lights were very different from motor or jet exhausts as seen at night. I am familiar with the appearance of these.

"From the front edge of the wing strips extended to the rear edge of the wings with the strip ending between the lights of each pair. These strips had poor reflection.

"Each pair of lights were separated by about eight times the distance between the lights of one pair.

"The wings appeared to retain their size from the center to the end without any taper.

"No identification or markings could be seen and this aircraft had no colored lights of any kind that could be seen. The aircraft was in my sight about 1 minute.

"This is a true description of the aircraft as I observed and remember it.

/s/ HUGH E. YOUNG "

The original of the above statement is on file at Headquarters, 17th District Office, and is available upon request by proper authority.

"26 August, 1951
4212 East Cooper Ave.
Albuquerque, N. Mex.

"On the night of 25 August, 1951, at my home at 2158 hours I observed for about 30 seconds an unfamiliar aircraft traveling from 100 west of north in the direction of 100 east of south. The rate of speed of the aircraft might have been 350 miles per hour.

"The aircraft was low enough for the neon and car lights of East Central Avenue to be reflected from it. The altitude of the aircraft was difficult to judge.

"The size of the aircraft was apparently 1 1/2 to 2 times of that of a P-36.

"The type of the aircraft was that of one with wings swept back 150 approximately. No fuselage was visible. The wings did not appear to taper at the outer ends. On the rear edge of each of the wings at least 6 and possibly 8, soft, white lights were visible. These lights were round, not trailing as in jet aircraft exhausts seen at night. These lights were grouped in two with a larger distance between the pairs than between each one in a pair. No red or green lights were visible. As the object moved further south the lights were not visible.

"The underneath surface of the wings of the aircraft appeared to have stripes running from the leading edge to the rear edge of the wings between each pair of lights. These stripes reflected the light whereas the areas between the lights did not reflect light well.

"The most outstanding feature of this observation was the fact that there was no audible sound from motors or jets. In fact the aircraft made no noise that I could hear.

"The above statement is true to the best of my ability to describe this incident.

3. In an attempt to ascertain if the YOUNG's could possibly have mistaken an aircraft landing at Kirtland Air Force Base for the one they reported, the following investigation was conducted:

4. On 27 August 1951, the "Incoming Aircraft Log and the AF Form 83's for 25 August were checked with the aid of Captain DONALD E. CHRISTENSEN 14672A of the Administrative Flight Section. The records revealed that a transient B-25 landed at 2107 and departed for Chanute Air Force Base at 2219. This aircraft was the only one on record operating within several hours of the reported time of the observation.

5. The following Commercial Air Carriers, which operate in this area, were checked to determine if they had aircraft flying in the vicinity at the time of the sighting reported by the YOUNG's, with negative results:

Frontier Airlines
Trans World Airlines Inc.
Continental Airlines
Pioneer Airlines

6. Investigation of Federal Bureau of Investigation; Sheriff, Bernalillo County; Albuquerque Police Department; State Police; Security Section, Sandia Base, Kirtland Air Force Base, 34th Air Division (Defense) revealed no other reports of a similar observation.

7. In that all logical investigative leads have been completed and reported, no further action is contemplated by this District.

IN REPLY REFER TO:
ADVIN-ATIAA-2c

SUBJECT: (Confidential) Unconventional Type of Aircraft Sighted by
Hugh R. Young at Albuquerque, New Mexico, at 2158 Hours,
25 August 1951

TO: Inspector General, USAF
17th District Office of Special Investigation
Kirtland Air Force Base, New Mexico

1. Reference is made to your Spot Intelligence Report of 27 August 1951, subject as given above. It is not known whether or not you are familiar with a report from OSI District Office No. 23, Carswell Air Force Base, Fort Worth, Texas, in which a similar sighting over Lubbock, Texas, on 25 August 1951 is reported. Inclosed is a copy of this Spot Intelligence Report for your information.

2. Also inclosed are four photographs taken by Mr. Carl Hart, Jr. on 30 August 1951 which are supposedly very similar to those seen over Lubbock, Texas, on 25 August 1951. It is requested that these photographs be shown to Mr. Hugh R. Young and obtain his opinion as to whether or not this is what he saw over Albuquerque on the night of 25 August 1951. If he does concur that this is what he saw, have him sketch in the wing that he reported seeing and obtain any other details that he may be able to give.

3. The Strategic Air Command has been contacted and they had no B-36 type aircraft in the area at the time. Northrop Aircraft Company has also been contacted and none of their flying wing bombers were flying.

4. It is suggested that the Flight Service Center for this area be contacted and questioned as to whether there were any unusual incidents on the night of 25 August 1951. It is believed that flight service centers occasionally make notes of unusual happenings and report unusual sightings according to regulations of CIRVIS (JANAP-164-A) and MATS Regulation 200-3.

TO: Commanding Officer
Air Technical Intelligence Center
Wright-Patterson Air Force Base
Dayton, Ohio
ATTN: Chief, Technical Analysis Division

1. Reference is made to your letter, dated 30 October 1951, subject as above, file AFOIN-ATIAA-2c.
2. This District was not familiar with the reported sighting over Lubbock, Texas, on 25 August 1951, as indicated in the Spot Intelligence Report inclosed with referenced letter.
3. On 10 November 1951, Mr. and Mrs. HUGH R. YOUNG, were shown the photographs inclosed with referenced letter, and stated the formation of lights appeared similar to the lights they had observed on the trailing edge of the unidentified object they saw at 2158 hours, 25 August 1951, over Albuquerque, New Mexico. Mr. YOUNG sketched in the outline as shown on inclosure 1.
4. In addition to the outline sketched on the photograph, Mrs. YOUNG, assisted by her husband, drew a sketch of the object sighted, which is attached as inclosure 2.
5. On 13 November 1951, Mr. D. M. BUSSEY, Chief, Aircraft Communicator of the Air Route Traffic Control Center, Albuquerque, New Mexico, was contacted in regard to any unusual incidences that may have been reported on the night of 25 August 1951. Mr. BUSSEY revealed that there were no reports of any unusual sightings on 25 August 1951.
